- Strong enough for all steel and magnetic caps
- Convenient controls on top of unit to adjust crimp
- For flip-off caps, available in 13 mm and 20 mm sizes*
  Not for use with Flip-up caps
- Optional base and mounting kit

The Ziemer High Power Crimping Tool is designed with interchangeable jaws, so that you only need one tool for various functions in your laboratory. The jaw sets are available as crimper and decappers which fit standard lab vial seals with aluminum or two-part aluminum/steel caps. The tools are ergonomically designed to reduce strain and arm injury associated with many manual crimping tools. Jaw sets are available in 8 mm (crimper only), 11 mm, 13 mm, and 20 mm cap sizes, including flip-off caps in 13 mm and 20 mm sizes.

Switching Jaw Sets: Jaw sets are easy to interchange. Simply insert the jaw set into the bushing at the bottom of the tool. Push up and twist until the set locks into position. To remove, push the outside button and rotate.
